Title: NESHAP for Prepared Feeds Manufacturing (Renewal)

ICR Numbers: EPA ICR Number 2354.03, OMB Control Number 2060-0635

ICR Status: This ICR is scheduled to expire on March 31, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart DDDDDDD.

Owners or operators of the affected facilities must submit an initial notification report, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required annually at a minimum.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 34 hours per response. “Burden” means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously

applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operator of area source prepared feed manufacturing facilities.

Estimated Number of Respondents: 1,800

Frequency of Response: Initially and annually.

Estimated Total Annual Hour Burden: 62,079

Estimated Total Annual Cost: \$6,048,294, which includes \$6,011,058 in labor costs, no capital/startup costs, and \$37,236 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance (new facilities) as compared to on-going compliance (existing facilities).

The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities. This includes purchasing monitoring equipment and establishing recordkeeping systems. This ICR reflects the on-going burden and costs for existing facilities. Activities for existing source include continuously monitoring of pollutants and the submission of annual compliance certifications. The overall result is an increase in labor hours and cost for both the respondents and the Agency.

There is a decrease in capital/startup costs and an increase in O&M costs for the respondents. The capital/startup costs decreased because existing sources have already purchased monitoring equipment necessary to comply with the rule. The overall O&M costs increased because the previous ICR only accounted for the operation and maintenance costs incurred during the third year after rule promulgation. This ICR reflects annual O&M costs for each year of the ICR's three-year period.

Additionally, there is an adjustment increase in labor rates which also attributes to an increase in cost. This ICR uses updated labor rates from the Bureau of Labor Statistics to calculate burden costs.
